Clinical Trial Risk Analytics | Centralized & Risk-Based Monitoring | Data Visualization & Storytelling

SUMMARY

Clinical trial risk analyst with 20+ years in pharma, from analytical development to centralized monitoring. Remotely assess risk and data quality analytics in CluePoints, translate signals into a clear risk story for study teams and leadership, and extend the analysis with R, Spotfire, and Quarto when deeper investigation is needed. Train fellow risk analysts on KRI signal writing and data quality assessment within BMS's risk-based monitoring framework.

CAREER HIGHLIGHTS

- **Data Storytelling:** Turn complex site and study data into visual narratives that support study team decisions and inspection readiness; present to non-technical audiences and leadership.
- **Analytics & Dashboards:** Extend centralized monitoring with R scripts, Quarto reports, and Spotfire dashboards, including the Study Plan Alignment Dashboard, to verify study plan compliance before FPFV and reduce manual review effort.
- **RBM Enablement & Industry Reach:** Lead KRI signal writing and Data Quality Assessment workshops for BMS's STAR+ (CluePoints) system; contributed analysis to a PHUSE white paper on Quality Tolerance Limits.

PROFESSIONAL EXPERIENCE

Senior Manager – GDO, Clinical Trial Risk Management, Bristol Myers Squibb (BMS), Lawrenceville, NJ | Jan 2023 – Present

Perform centralized monitoring and risk analytics to support oversight of sites, countries, and studies for compliance, patient safety, data quality, and reliability.

- **Centralized Monitoring & Risk Review:** Review CluePoints data and write signals for 10 studies ahead of Risk Review Meetings held every six weeks, identifying trends, outliers, and unusual patterns in aggregate clinical and operational data; align new and open signals with risks in the Integrated Risk Management Plan, prioritize signals for discussion, and present the risk story to study teams in the RRM deck.
- **KRI & QTL Design:** Lead discussions with the study architect lead and study team to define standard and study-specific KRIs and QTLs for approval and inclusion in the CluePoints monitoring specifications.
- **Inspection Readiness:** Analyzed AE/SAE, protocol deviation, and enrollment data for 2 studies in R, delivering Quarto HTML site risk-assessment reports used to prepare for inspection and support GCP-compliant readiness.
- **Training & Enablement:** Designed and led workshops on KRI signal writing and Data Quality Assessment (DQA) for BMS's STAR+ (CluePoints) risk-based monitoring system, training ~11 analysts across the Clinical Trial Risk Analyst group.
- **Dashboard Development:** Built the Study Plan Alignment Dashboard (R back-end, Spotfire front-end) to verify study plan compliance prior to first patient first visit (FPFV).
- **Technical Advisor, Internal Rotation:** Contributed to metric design and early Power BI dashboard development.
- **Exploratory Data Analysis:** Applied z-score and normalized comparisons across protocols to surface outliers and patterns in issues logged under the generic "Other" category and subcategory; delivered findings in interactive Quarto reports.
- **Text Analytics:** Applied N-gram and LDA topic modeling to unstructured text from these issues, surfacing themes in safety tracking, IP management, training, and documentation.
- **Industry Contribution:** Analyzed raw Quality Tolerance Limit (QTL) survey data with the PHUSE RBM working group and built the charts published in the white paper Assessing the Use of Quality Tolerance Limits in the Pharmaceutical Industry, using R and ggplot2.

Senior Scientist/Manager – BD, Method Trending & Monitoring, Bristol Myers Squibb, New Brunswick, NJ | Jul 2020 – Jan 2023

- **R Programming & Reporting:** Developed R scripts for data wrangling and visualization of early- and late-stage SEC-PAV data across 28 biologic products; delivered insights through R Markdown reports to support product progression.
- **Quality by Design:** Analyzed data in Python across five analytical methods for 10+ biologic molecules, identifying changes and supporting method reliability.
- **Comparative Analyses:** Compared analytical method performance against validation criteria, ensuring data met quality and regulatory standards.

Earlier Roles at BMS | 2014 – 2020

Scientist I/II – Methods & Analytical Development
Associate Scientist II – Analytical Development
Associate Scientist II – Mass Spec & Biophysics

- Conducted method development, validation, and characterization for monoclonal antibodies.
- Supported product progression by performing trend analysis and stability visualization in Spotfire.

Early Career Experience

Associate Scientist I – Analytical and Bioanalytical Development, BMS | 2012 – 2014
Scientist – Development Analytical, Pfizer | 2010 – 2011
Senior Associate Scientist – Development Analytical, Pfizer | 2008 – 2010
API Associate Technical Specialist – Global Manufacturing, Pfizer | 2006 – 2008
QC Laboratory Technician III – Global Manufacturing, Pfizer | 2002 – 2006

Skills

Centralized Monitoring | Risk-Based Monitoring (QbD) | KRIs & QTLs | Data Quality Assessment | Risk Signal Triage | GCP | Inspection Readiness | Data Visualization & Storytelling | Stakeholder Influence
Programming & Reporting: R, Python, Quarto, R Markdown
Statistics Software: Minitab 17, JMP 13
Data Visualization: TIBCO Spotfire, Tableau, ggplot2, R Shiny
RBM Platforms: STAR+ (CluePoints), Medidata RAVE CSA, Cyntegrity MyRBQM
Clinical Systems: Veeva CTMS

Education

Bachelor of Science, Chemistry, University of Puerto Rico, *Mayaguez, PR*

Selected Projects

- Launch Curve Forecaster — Governance-first oncology launch planning with revenue-at-risk analysis (repo)
- Clinical Trial Forecaster — Trial duration prediction with validation-first methodology (repo)

Additional Training

Cornell University: Data Analytics 360 Certificate | Machine Learning Certificate | Project Management Certificate
Business Science University (BSU): 5-Course R-Track
Coursera: Python for Everybody | Applied Data Science with Python | Data Visualization with Tableau
Analyst Academy: Data Viz for Consultants | Advanced PowerPoint for Consultants | Advanced Presentations for Consultants
Strategy.com / Overnight Strategist: Think Like a Strategy Consultant | Strategist Toolkit
